

## BREATH ALCOHOL IGNITION INTERLOCK DEVICE CERTIFIED SYSTEMS LIST

A breath alcohol ignition interlock device is a constant monitoring device which, when installed in a motor vehicle, prevents the motor vehicle from being started without first sampling the operator's breath alcohol concentration. If the operator's breath alcohol concentration is greater than a predetermined concentration level, the device prevents the motor vehicle from being started.

The following is a list of certified systems that meet the requirements as a breath alcohol ignition interlock device in Utah:

### **RoadGuard Interlock:**
